

# Polyethylene Wax Dispersion

with advanced dispersion technology

additives for gravure ink

## POLYCON B-158

The most common toluene-based additives for gravure ink with high versatility. B-158 has superior properties such as anti-blocking, abrasion resistance and scratch resistance with high cost-performance.

| Product Name         | Wax Type            | Solvent        | Non-volatile |
|----------------------|---------------------|----------------|--------------|
| <b>POLYCON B-158</b> | <b>Polyethylene</b> | <b>Toluene</b> | <b>15%</b>   |

We can offer you the optimal solution based on your needs.
